

## MORE INFORMATION

FeetNique provides Basic and Advance Medical Foot Care Nursing Services to residents in their homes in facilities or in the community.

Services includes:

- ◆ Assessment of the feet, checking pulses, skin integrity, and providing general nail care.
- ◆ Clipping of the toenails.
- ◆ Treating ingrown nails (Onychocryptosis).
- ◆ Onyfix for correction of ingrown and involuted/pincer toenails.
- ◆ Diabetic Foot Care and care to other high-risk clients.
- ◆ Treating fungal nails (Onychomycosis).
- ◆ Treating thick nails and Ram's horn nails (Onychogryphosis).
- ◆ The treatment of corns and calluses etc.
- ◆ FeetNique staff will also assess footwear.
- ◆ Direct insurance billing for Veterans.

In addition, we help identify infections, circulatory issues, skin conditions and make appropriate referrals for diagnosis and treatment.

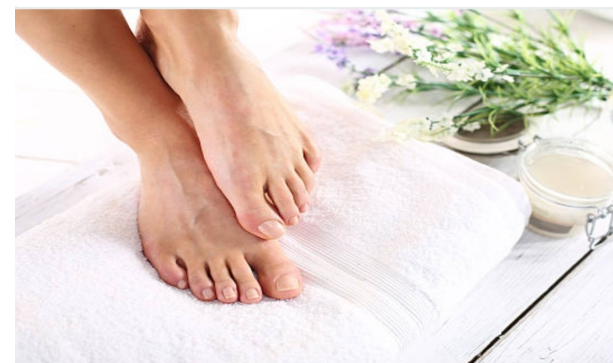

## About Us

Through many years spent working in multiple Long Term Care Homes, Retirement Homes and also in the community.

Our passion for foot care grew seeing the complications that have developed, especially in high-risk patients from the lack of proper care.

Realizing proper foot care can mean the difference between clients losing a limb and keeping their feet, our mission is to help the general public and seniors remain mobile and independent.

## WHY IS FOOT CARE IMPORTANT ?

- ◆ Foot care helps prevent falls in seniors.
- ◆ Regular assessments of the feet facilitate early detection and treatment of i.e. cuts, bruises, ingrown nails, stage one wounds/ulcers etc.
- ◆ Foot care can help keep clients mobile through treating corns, calluses and thick nails etc., which are common sources of pain and discomfort.
- ◆ Foot care can make a difference in helping clients keep their toes or feet, especially Diabetics.
- ◆ Assessing whether your footwear is appropriate or is the cause of conditions such as Bunions, Hammer toes, Ingrown nails etc., is important in keeping your feet healthy.

## YOUR FEET ARE IN GOOD HANDS

Here at FeetNique we make the safety of our clients and nurses a top priority.

- ◆ FeetNique follows best practice guidelines when providing foot care.
- ◆ All equipment is thoroughly cleaned and sanitized between clients.
- ◆ All tools are thoroughly cleaned, disinfected and sterilized using a medical grade steam Autoclave per Infection Prevention and Control Canada (IPAC) standards.
- ◆ PPE is used with every client.
